## 2 Systems Flat roof leak detection!

Set **€ 5999.- Netto**

### FDO 4.7P Flat roof leak detection case

**€ 4499.- Netto**

#### Area of use

Flat roof and pool

#### Possible applications/Flat roofs

Gravelled

Greened

Terrace on flat gravel

Roofing felt Supported systems

## SOS 4.7 P Fog gas analysis system **€ 2499.- Netto**

to augment the FDO 4.7P flat roof leak detection system case

This procedure is suitable for very large roofs without specific ballast. The basic principle is, a pressurized air-smoke mixture generated under the sealing layer discharges at the leak as a visible fog. Connection points, perimeter areas and rear vents can be checked very well and quickly. Similarly, the procedure for leak testing and quality assurance has been used successfully in new constructions

[Our Video on Youtube](#) offers a short insight into the operation of our systems and our work - we would be delighted if you dropped by.
